

**FURUNO**

# 8.4" Color LCD FISH FINDER

Model **FCV-588**

**Fantastic clarity and target separation with RezBoost™ technology!**

More details on [www.furuno.com](http://www.furuno.com)

# FCV-588 boosts your catch of the day with high resolution and clear target separation,

Fish Finder technology took a big leap with RezBoost™!

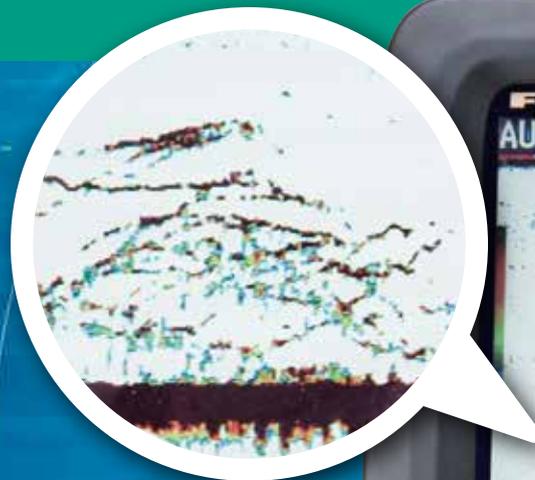

## RezBoost™

RezBoost™ is a revolutionary signal processing technology developed by FURUNO that improves resolution and target separation when using conventional narrowband transducers. Spot individual game fish surrounding bait balls, as well as fish close to the seabed. With RezBoost™, not only can you expect higher resolution and crisper visuals, but also improvements in the ACCU-FISH™ function.

With RezBoost™ the capabilities of conventional narrowband transducers can be dramatically improved. Compared to conventional signal processing techniques (FDF), a RezBoost™ fish finder produces an image that is up to 8 times\*<sup>1</sup> clearer.

A TruEcho CHIRP™ fish finder (requires a special transducer) produces an image that is up to 10 times\*<sup>1</sup> clearer when compared with FDF. What can be done with a conventional narrowband transducer, just like the one you might have installed on your vessel, is truly impressive\*<sup>2</sup>.

\*<sup>1</sup> RezBoost™ performance may vary depending on depth, range and signal frequency used.  
\*<sup>2</sup> The Enhanced mode of RezBoost requires a RezBoost capable thru-hull or transom mount transducer.

## 8.4" Color LCD FISH FINDER

Model **FCV-588**

# RezBoost™ technology that provides utilizing a compact narrowband transducer

- ▶ **Dual-frequency fish finder equipped with revolutionary new RezBoost™ signal processing technology**

Improved clarity and resolution that was previously impossible with conventional narrowband transducers has been made possible thanks to the new RezBoost™ technology.

- ▶ **ACCU-FISH™ - A unique fish size analyzer based on the latest digital technology**
- ▶ **Bottom Discrimination - Analyze bottom structure**

Provides an at-a-glance recognition of bottom composition with four types of graphical displays (Rocks/Sand/Gravel/Mud) when connected to a supported thru-hull or transom mount transducer.

- ▶ **White Line feature - Discriminate fish lying near the bottom**

The top edge of the bottom echo is displayed in white to clearly show bottom structures. This feature helps to discriminate between weeds and bottom fish distinctly.

- ▶ **Configurable Alarm function** (depth, fish echoes, etc.)

- ▶ **Share and display information on a chart plotter\***

FURUNO TLL (Target Lat/Lon) output allows you to interface the FCV-588 with your FURUNO chart plotter so that you can mark fishing grounds with various information (L/L, Depth, Water Temp, Fish size and Bottom type).

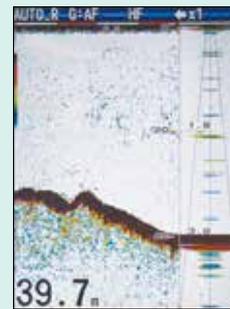

\* Requires a chart plotter.

- ▶ **Fast transmission rate of 3,000 PRR** (Pulse Repetition Rate) per minute (at 5 m depth range)

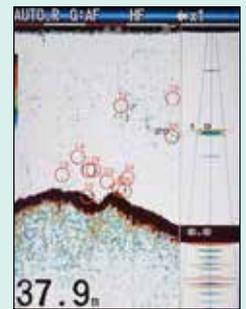

# RezBoost™ technology that provides utilizing a compact narrowband transducer

With RezBoost™ technology, the resolution is increased, leading to sharper and more defined echoes. Thanks to this increase in resolution, the accuracy of the ACCU-FISH™ function is also improved. ACCU-FISH™ is very useful when you need to determine fish size, offering the added benefit of making fish echoes more visible when viewed from a distance. When ACCU-FISH™ is on, you can spot individual fish echoes even from the deck on your vessel.

ACCU-FISH™ OFF

ACCU-FISH™ ON

## ACCU-FISH™ identifies individual fish with size and fish mark function

### Recognizes individual or multiple fish instantaneously

ACCU-FISH™ is a fish size assessment function of FCV-588 that is proprietary to FURUNO. In order to assess individual fish size, echo returns are evaluated based on strength and turned into fish size display on screen.

ACCU-FISH™ can detect fish size from 10 to 199 cm, in depths of 2 to 100 m.

### ACCU-FISH

### Display fish marks

The fish mark can be utilized to display individual fish echoes when they are detected. It helps beginners to identify fish echoes for a more engaging fishing experience. Fish marks are selectable from either a circle or square other than two fish symbols. The fish symbols, displayed in two different sizes (Large: over 50 cm, Small: 10 to 49 cm), are a great help for anglers when identifying individual fish. The circle and square symbols identify individual fish without hiding the underlying echo.

Circles displayed over fish echoes along with their approximate size.

In some instances, fish size indicated on FCV-588 may differ from actual size. Please read the operator's manual carefully before using this feature.

## Bottom Discrimination function

FCV-588's Bottom Discrimination function enables the fish finder to indicate whether the bottom is composed mainly of rocks, gravel, sand or mud. The Bottom Discrimination function provides you with valuable information that helps you locate rich fishing grounds, and boost your catch of the day.

Please keep the following in mind when using the Bottom Discrimination Sounder:

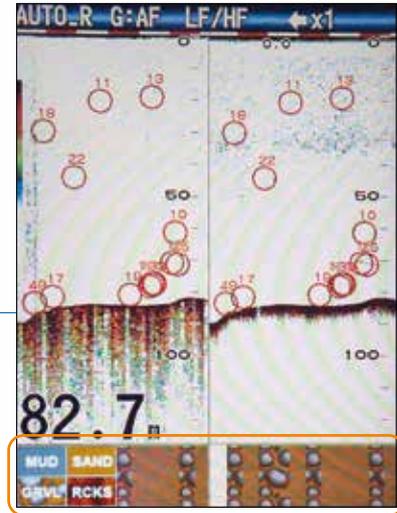

- 1) Use at a depth of 5 m - 100 m.
- 2) Use a transom or thru-hull mount transducer.
- 3) Install the transducer parallel to the bottom of the vessel.
- 4) To show a consistent display of the actual bottom, set the display range to "auto".
- 5) Enter the ship's draft value.
- 6) Use a ship speed of 10 kn or less.
- 7) In some instances, the bottom component indicated on the FCV-588 may differ from the actual bottom structure.  
Please read the operator's manual carefully before using this feature.

## White Line function distinguishes fish from the seabed

This function is useful for discriminating bottom fish as well as judging fish school density. The seabed line will be sharply defined against the white line drawn right under the seabed line.

## Fish Alarm function

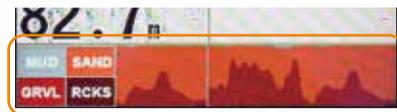

When fish echoes appear in an area preset by the user, the FCV-588 will sound a loud alarm and display an alarm icon on the screen. The integrated alarm can also be set to be triggered by specific conditions of water depth, target depth, water temperature, bottom type and more. You never have to miss a target again.

Rocks  
 Gravel  
 Sand  
 Mud

### Graphic mode

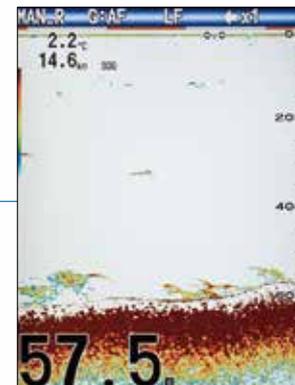

The standard graphic display mode shows the most probable bottom composition by graphic or four colors.

Rocks  
 Gravel  
 Sand  
 Mud

### Probability mode

The probability display mode shows the most probable bottom composition in graph form.

Setting	
Name	: ALARM1
Sound	: [Sound]
Fish Type	: ACCU-FISH
From	: 4 inch
Span	: +1 inch
Fish Level	: Medium
Depth	
From	: 0m
Span	: +30m
Temperature	: Off
From	: 20.0°C
Span	: 1.0°C

# Swivel mounting bracket

The gimbal mount allows the display unit to swivel around when desktop mounted. You can adjust the angle of the display for optimal viewing comfort.

## SPECIFICATIONS OF FCV-588

### GENERAL

Frequency 50 and 200 kHz  
 Output Power 600 W/1 kW\*  
 \*To use 50/200-1T, matching Box MB-1100 required

### DISPLAY

Display Type 8.4" color LCD  
 Effective Display Area 128.2 (W) x 170.9 (H) mm  
 Pixel Number 480 x 640 (VGA)  
 Display Single frequency (50 or 200 kHz), Dual-frequency, Zoom, Nav data, A-scope, Marker zoom, Bottom zoom, Bottom-lock, Bottom Discrimination, ACCU-FISH™, RezBoost™

Basic Range 2-1200 m\*

Alarm \*m, ft, fm, HR, pb can be selected in the menu  
 Bottom, Fish (Normal), ACCU-FISH™, Fish (B/L), Bottom Discrimination, Fish Level, Water temperature, Speed, Arrival and Battery

Language English, French, Spanish, German, Italian, Portuguese, Greek, Polish, Danish, Swedish, Norwegian, Finnish, Chinese, Japanese, Thai, Vietnamese, Indonesian, Burmese

Range Phasing up to 1200 m  
 Expansion Range Bottom-lock : 2-10 m, 7 to 30 ft  
 Sectional : 2-1200 m, 7 to 4000 ft

Picture Advance Speed 8 steps: stop, 1/16, 1/8, 1/4, 1/2, 1, 2, 4

Pulselength & PRR 0.04 to 3.0 ms, Max 3,000 pulse/min  
 Interface (IEC61162-1, NMEA 0183 Ver 1.5/2.0/3.0)  
 Input: BWC, GGA, GLL, GNS, HDG, HDT, MDA, MTW, MWV, RMA, RMB, RMC, VHW, VTG, XTE, ZDA  
 Output: DBS, DBT, DPT, MTW\*, RMB\*, VHW\*, TLL\* by key operation  
 \* External data required

### ENVIRONMENT

Temperature -15°C to +55°C  
 Waterproofing IP56

**POWER SUPPLY**  
**EQUIPMENT LIST**  
**Standard**  
 1. Display Unit CV-588  
 2. Installation Materials and Standard Spare Parts

- Option**  
 1. Speed/Temperature Sensor  
 ST-02MSB, ST-02PSB, T-04MSB, T-04MTB  
 2. Connector Kit for Connection of Temperature Sensor or Speed & Temperature Sensor  
 3. Matching Box MB-1100 (For 1 kW output with some transducers)  
 4. NMEA+Power Cable

### Transducers (Specify when ordering)

#### 600 W

520-5PSD, 520-5MSD, 520-PLD, 525-5PWD, 525T-PWD, 525T-BSD, 525T-LTD/12, 525T-LTD/20, 525STID-MSD, 525STID-PWD, SS60-SLTD/12, SS60-SLTD/20

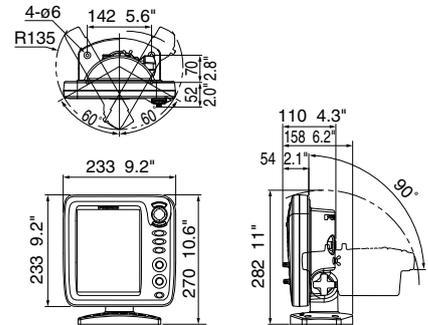

#### 1 kW

50/200-1T matching Box MB-1100required, 526TID-HDD

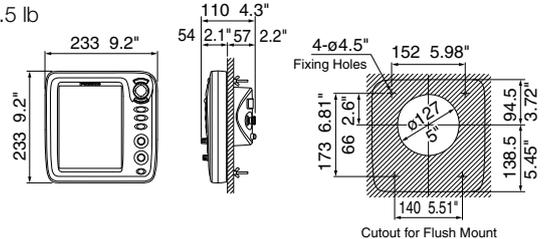

Additional transducers that do not support the Enhanced mode of RezBoost™ are also available

### DISPLAY UNIT

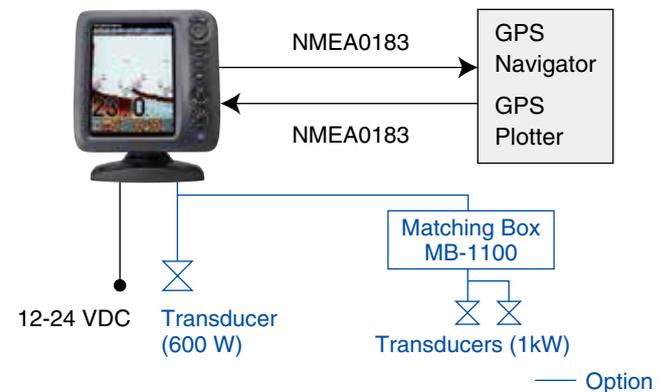

Bracket Mount  
 2.3 kg 5.1 lb

Flush Mount  
 1.6 kg 3.5 lb
